

## On to a New Adventure ...

### NH Public Health Wishes Dennis Holt a Happy Retirement!

After seven years with the Division of Public Health Services, we say farewell at the end of the month to Dennis Holt, Data Analyst for NH Health WISDOM, Environmental Public Health Tracking Program and the Social Vulnerability Index Tool. During his time with the state, Dennis has led the charge for equal access, building the foundation for health equity dashboard and our social vulnerability index, providing a voice and visibility to the people in our state who struggle the most to lead healthy lives. He has forced us to look for meaningful ways to provide valuable information in beneficial ways that articulate uncertainty without diminishing significance.

Dennis has played a key role on projects that have changed policy in New Hampshire and throughout the region. We wish him a very happy retirement as he embarks on this new journey in his life.

### New data updates:

The NH Health WISDOM team has been busy behind the scenes with the release of the 2015 in-state hospital discharge data, and updating the following datasets: American Community Survey (ACS) and Air Quality PM 2.5 and Ozone Modeled and Monitored.

#### Need Training?

Contact Lynne Clement at [lynne.clement@dhhs.nh.gov](mailto:lynne.clement@dhhs.nh.gov) to schedule.

Over 80% of our water flows back to nature untreated. Let's reduce and reuse wastewater to make the water cycle better for every living thing.
